EDUCATION

Alabama A&M University

B.S. Computer Science | GPA: 3.38

Normal, AL

Expected May 2027

Scholars: NSF 2024–2027 | LSAMP 2023–2027 | Five Strong Scholarship 2023–2027

Coursework: Data Structures, Discrete Structures, Theory of Algorithms, Operating Systems, Cryptography

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, C++, Java, JavaScript, SQL, HTML, CSS, Bash

Concepts: OOP, Algorithms, SDLC, Agile (Scrum), Machine Learning, Data Analysis Pipelines, Ethical AI, NLP, Graph Neural Networks (GNNs), AI Safety

Tools: Linux, Git, Jira, VS Code, PyTorch, PyTorch Geometric, scispaCy, HuggingFace Transformers, Ollama, Google Colab, AWS (EC2, S3, IAM, deployment), Figma, Vercel, Claude, GitHub Copilot

Certifications: AWS Certified Cloud Practitioner

EXPERIENCE

Summer AI Research Institute (SAIRI) | Morgan State University

Baltimore, MD

Undergraduate AI Research Participant

May 2026 – Present

- Developing a Cross-View Multi-Graph Contrastive Learning framework integrating genomics, transcriptomics, and DNA methylation data to predict antidepressant treatment response in Major Depressive Disorder (MDD) using biomedical LLM embeddings, PyTorch Geometric, and Graph Neural Networks (GNNs)
- Analyzing multi-omic patient datasets comprising 270,000+ biological features to identify predictive molecular biomarkers, conducting model benchmarking and biological pathway validation, and presenting findings at the CEAMLS SAIRI Summer Research Symposium (Expected July 2026)

Cornell University & Break Through Tech

Ithaca, NY

AI Fellow

May 2026 – Present

- Selected for competitive year-long national AI/ML fellowship; completing ML Foundations curriculum (12–15 hrs/week) covering data pipelines and model training
- Building industry project portfolio through AI Studio Challenge Projects; on track to earn ML Certificate from Cornell University (Expected 2027)

WGI

Huntsville, AL

Geospatial Software Engineer Intern

September 2025 – December 2025

- Built a cross-platform Python/Tkinter desktop application coordinating two data-processing tools, improving .laz validation workflow efficiency
- Collected, analyzed, and mapped 1,000+ geospatial data points supporting accurate deliverables for public and private sector clients

KPMG LLP

Atlanta, GA

Embark Scholar Intern, Tech Track

June 2025 – August 2025

- Supported eBay in developing risk management templates adopted across multiple teams; conducted competitor analysis across Advisory, Audit, and Tax practices
- Delivered data-backed recommendations to senior stakeholders through cross-functional collaboration

Lockheed Martin

Orlando, FL

Software Engineer Intern

May 2024 – August 2024

- Developed Sprinter, a Python-based Agile tool accelerating scenario execution and testing for the JASSM team
- Built clone.py to automate repository cloning and scenario testing, saving engineers 2+ hours weekly

PROJECTS

Local AI Assistant Environment | Ollama, Open WebUI, Python, Hugging Face, Linux/macOS CLI

May 2026

Configured and deployed a fully local LLM environment using Ollama and Open WebUI, enabling private AI chat and model inference workflows

Integrated open-source language models and optimized local AI infrastructure with Hugging Face model downloads

Notion Font Preset Tool | React.js, JavaScript, Vercel

May 2026

- Built a responsive web tool for generating and previewing custom Notion font presets, deployed live via Vercel

LEADERSHIP & AWARDS

2024 - 2025 AAMU-ACM Chapter, President | 2025 - 2026 AAMU SGA, Junior Senator

Affiliations: Alpha Kappa Alpha, Inc, ColorStack, Girls Who Code, AAMU Google Developer Student Club, SEO, MLT

Awards: 2025 JP Morgan Data For Good | 2024 AABE HBCU Energy Hackathon, 1st Place | 2024 TMCF NexTech Innovation Challenge, 2nd Place
